Submission Options

Participants have a choice of three submission options (all submissions will be peer-reviewed):

1. Book Chapter (4 6,000-word submission + oral presentation at CUPUM 2025)
2. Short Conference Paper (1,500 word extended abstract + oral presentation at CUPUM 2025)
3. Poster (250-word abstract + attendance at poster session(s) at CUPUM 2025)

Please submit via our [conference submission page](#).

At least one co-author must register for, and present the chapter or paper at, the conference. All submissions of proposed book chapters, short conference papers or posters should be written in English and include an abstract that contains a title together with a brief description of the proposed topic, methods used, key results, and some discussion of the research implications for urban planning and urban management. All submissions also should be accompanied by the name, affiliation and email address of each author. For co-authored papers, one individual should be identified as the presenting/corresponding author.

Option 1: Book Chapter

We will continue the CUPUM tradition of publishing a book in conjunction with the conference, our 7th. Around 25 chapters will be selected for inclusion in a book, tentatively to be published by Springer in time for the conference. These chapters will be selected based on the outcomes of a double-blind peer review process overseen by the book co-editors. Chapters not accepted into the book will be invited to be revised and resubmitted as conference papers (see below). Chapters should be 4,000 to 6,000 words in length, including notes and references. Please count each figure and table as 250 words towards the total length. Chapters need an abbreviated abstract (max 250 words) covering the introduction, methodology, main findings/conclusions, and recommendations. Inclusion of the paper as a chapter in the book implies acceptance of a publishing agreement which requires a copyright agreement with the publishers. Accepted book chapters will be given an oral presentation slot at the conference. We recommend that b
